Pop Vocals Course

All about the correct singing techniques

Learn the fundamentals of singing in the style of Beyonce, Rihanna and other pop divas in this course!

Singapore's soul sensation, Lim Huimin takes you on a musical exploration of the basics in pop singing, including securing breath control, posture, voice projection and singing through songs. Apart from pop & jazz vocal exercises that will help keep your voice in shape, you will also explore a variety of pop, jazz, mandarin songs and even ballads. This course aims to provide singers with a good foundation in singing technique (posture, breathing, anatomy, support, tone production) and then guide you on how you can use your voice for a variety of musical genres.

Singers will go through the 8 sessions exploring first the foundations of good singing habits and, following that, attempt to sing songs of different musical genres. The objective of the course is to learn the proper way of breathing, singing and supporting the voice with the correct muscles. Through this you will gain the ability to add stylistic components to the songs you want to sing solo. Furthermore, you'll learn how to be able to sing in a group with harmonies.
